

FREE THE ANNALS

90th Anniversary Drive of the International Commission on Radiological Protection
Part of the ICRP Advancing Together Initiative

International organisations, national authorities, standard-setting bodies, and professionals rely on the recommendations of the International Commission on Radiological Protection (ICRP) to protect patients, workers, the public, and the environment against harm from ionising radiation. These recommendations are published in ICRP's dedicated journal, **Annals of the ICRP**.

Let's celebrate ICRP's 90th anniversary by making access to the Annals free. To realise this goal, we aim to **raise €500 000 by the end of 2018**. Thanks to the UAE Federal Authority for Nuclear Regulation and the US Department of Energy, the initiative launched with **20% of the needed support already achieved**. With this, all publications from 1928 to 1988, and a few others including the most recent fundamental recommendations *Publication 103*, are already **free to access at www.icrp.org**.

More contributions are needed from a diverse range of supporters to Free the Annals, especially from organisations that rely on the recommendations of ICRP. Success will:

- Make all ICRP publications, except for the most recent rolling two years, free to access
- Address challenges with access in developing regions, ensuring protection of patients, workers, the public, and the environment world-wide
- Simplify distribution to professionals, policy-makers, and the public everywhere
- Promote collaboration across the radiological protection community
- Recognise the organisations contributing to this transformational initiative

"We are delighted to lead the way with a meaningful contribution towards making the Annals of the ICRP available for free, and in particular we are proud that Publication 103 is now available to everybody thanks to our contribution. Easy access will be a boon to governments, scientists, professionals, and interested citizens world-wide. Let's take on this important initiative together."

Christer Viktorsson, Director General, UAE Federal Authority for Nuclear Regulation (FANR)

"We are pleased to join other agencies and countries in ICRP's efforts with our contribution towards making the Annals of the ICRP available for free; and, in particular, we are thrilled that Publication 103 will be available to everyone. Access will be a benefit to radiation protection professionals, scientists, and interested countries world-wide. Let us undertake this critical initiative together."

Dr. Patricia R. Worthington, Director, Office of Health and Safety, US Department of Energy

Established in 1928, ICRP is an international, independent, registered charity (UK Charity #1166304), relying on voluntary contributions to support our work. Our ~250 expert members from more than 30 countries and all disciplines relevant to radiological protection volunteer their time to ICRP. Together we develop the System of Radiological Protection, which forms the basis of standards, legislation, guidance, programmes, and practice worldwide.
